SUMMARY

A hard-working, personable, friendly and responsible Full-Stack Developer who works well in a team environment. I have a strong understanding of Core programming concepts, and I'm well versed in many different languages. I worked on two 2 week long live projects which can be viewed on my GitHub. The first Live Project was a Python project using Pycharm, Django and Azure Devops.

I created a web app showing the NBA leader in assists and leader in points and seeing what correlation that has between how far a team makes it in the playoffs. My second live project was a C# using Visual studio code and Azure Devops. We created a movie database website, and I was in charge of the blog photos section. I also have completed a lot of other miscellaneous projects that can be viewed on my Github!

PROFESSIONAL SKILLS

Full-Stack Developer, Computer and Technology Basics, Version Control, Visual Studio, Visual Studio Code, Pycharm, Django, Azure Devops, HTML, CSS, JavaScript, Python, SQL, C#, and .Net Framework. Also very good with Social Media, Customer Service, Collaborative Leader, and a great ability to Self-teach.
